

ULTRA LIGHTWEIGHT
DUAL-OUTPUT MEDIA PLAYER

ANYSTATION PICO

Perfectly pre-configured ultra small high-resolution mediaplayer with passive cooling and 24/7 durability - perfect for fixed installations.

Anystation Pico is an inexpensive yet super-powerful media server. Supporting 2x WUXGA or 1x 4K@60Hz output and high-performance, high-quality codecs like HAP and NotchLC. Through the integrated EXAPLAY software, the Pico is a perfect replacement for standard hardware players, offering greater versatility and improved performance, e.g for high-res LED walls.

Includes EXAPLAY

Fully equipped with our top-notch software EXAPLAY, which enables high-quality playback on multiple timelines and cue lists, supporting the latest GPU-based codecs. Configurable cues and IN/OUT trigger commands, such as OSC and UDP, make integration seamless and highly efficient.

Headless Control

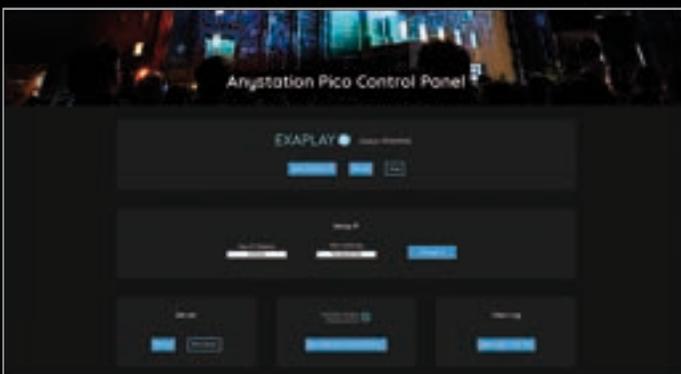

The EXAPLAY interface and server configuration are fully accessible through a web browser, making setup and playback straightforward.

For deeper configuration, you can always access the server via the VIOSO Orbit remote control.

Optional Camera Calibration

Capable of performing the patented VIOSO auto-calibration for projectors, enabling the creation of seamless images with ease.
